

ANALYSIS

A feedback poll from a training event in Bulgaria on the project "Water in our World", Erasmus +

The survey, made after the learning event in Bulgaria among the participants, outlined the following trends and conclusions:

1. At the end of the learning event, participants are motivated to work on project activities
2. Participants make preliminary inquiries into the venue of the learning event
3. The participants are familiar with the activities of the project calendar
4. The number of participating students in each partner school is about 50
5. Participants have a positive attitude to participate in the learning event
6. Participants disseminate the objectives and results of the project
7. Activities during the learning event are well planned
8. Acquiring new skills from the activities which are carried out
9. Positive attitude of the hosts to the participants from the partner schools
10. Improving language competencies
11. Positive influence on the attitude of the participants in the project towards foreign cultures and traditions, positive change in attitudes towards tolerance and sharing of cultural values
12. The activities carried out through work on the stages of the project increase the motivation of student for learning and the motivation to work among teachers
13. Products produced by students contribute to the development of new competences for students
14. Good organization in terms of placement of participants

Comments and recommendations:

- Positive influence on students and teachers
- Excellent organization of the training event
- Conducting a second learning event in Bulgaria
- Acquiring an excellent experience for organizing events
