Mr / Mrs Director of Water Witness International
United Kingdom
Edinburgh
4 Hunter Square

COVER LETTER

I am Ūla Mitkevičiūtė and I'm applying for the position of Research and Communications Officer in your company. I found the information about this job in a site joshswaterjobs.com.

I would like to work in your company because I think that air pollution, water deprivation, etc. are terrible things and only we can change it by starting saving and smart using. I also think that it's my chance to start helping people, saving Earth and moving in small steps towards a safer, more environmentally friendly and equitable future for all. I enjoy getting acquainted with different cultures, different lifestyles and I would love to travel to Africa not just to have a good time but also to assist indigenous people.

Unfortunately, I don't have any experience in this job but I'm sure that I will deal with all struggles and I will be able to work perfectly because everything is possible if you have enough passion and you try really hard.

It would be pleasure for me to take part in the interview and tell you more about myself.

Sincerely,
Ūla Mitkevičiūtė
