
Ayşe Dila Gürsoy

Marine Biologist

Siraselviler st. 16/7 Beyoglu/Istanbul - Turkey

HIGHLIGHTS

- Expert in conducting research about the aquatic life forms.
- Possesses skills in understanding oceanic climatic changes and their effects.
- Able to efficiently and correctly use diving equipment.
- Capable of dealing with various issues of marine vegetation and creatures.

EXPERIENCE

National Marine Institute - *Marine Biologist*

July 2013 - Current

At the National Marine Institute I conducted various research assignments on the growth of certain marine animal populations as well as supervised certain lab experiments. I also measured certain recording in trenches located near the institute.

EDUCATION

Istanbul University, Istanbul - *Master of Science: Marine Biology and Fisheries*

September 2008 - AY 2012

I minored in marine chemistry and had assignments dealing with marine processes and the vegetation and creatures that live in the ocean. At Istanbul University, I graduated at the top of my class, allowing me to receive an academic excellence reward.
