TURKEY

FIRSTLY

Our purpose of making this Project to inform you.

To talk about the Turkey.

We want to give you a bit about turkey.

TURKEY

- The Republic of Turkey is a country located in the capital Ankara and the soil in both Asia and Europe.
- The three sides of the country are surrounded by the Mediterranean Sea, the Black Sea and the Sea of Marmara and the Aegean Sea, which connect these two seas.

DROUGHT IN VARIOUS REGIONS

- It is a natural movement that occurs after little rain.
- Eastern Anatolia region of Turkey, is the most arid regions.
- if the rain is low the water problem arises

LIMY FLOW OF WATER

- The Mineral-containing water is limy water. The calcium mineral is water, " alkali " water. The formation of whitish deposits in the teapot, kettle, coffee machine during boiling, frequent blockage in the shower head, the formation of strange stains in the sink, and the fact that the water is very calcified.

There are various different taps of purify water

PROBLEMS

- Swimming pools in Istanbul are either empty or only half full, as Turkey braces for a particularly low-water summer. And that could be a huge problem for the city's nearly 14 million inhabitants who use more than 2 million cubic meters of water Daily

PROBLEMS

Turkey battles water shortage. Turkey has a serious water issue. The country is struggling with its worst drought in a decade. Climate change is only part of the reason; poor water management is also to blame.

WATER SHORTAGE

- Water in Turkey is usually cut.
- Water usually goes when the power is cut.
- Malatya is also the MASKI of the institution that deals with water Works.
- In the Turkey DSI
- When the water is cut, the water is usually ready from the markets. We are buy in markets.

THANKS FOR LISTENING 😊
